LABOR, MACHINE WORK, DYNO

Strip engine and inspect. Hone cylinders. Magnaflux crank and rods. Balance crank, flywheel, clutch and damper assembly. Drill out oil bungs in block and fit screw-in plugs. Mill water pump for cylinder head clearance. Hot tank block and re-enamel. Hot tank cylinder head, reface valves, recut valve seats, reassemble and adjust spring pressures. Reassemble bottom end. Machine rear bearing cap for correct positioning of rear seal conversion. Install new camshaft and lifters. Fit new ring set. Fit cylinder head, adjust valve timing. Make up carburetor heat shield and assemble carburetors onto manifold. Fit manifold and exhaust to engine, fit distributor with new cap, fit oil pressure adjuster.

Dyno: No ignition signal from Pertronix unit, fit new Pertronix module and break in engine for 1 1/2 hours, observe temperatures and oil pressure (OK). Test for power, adjust ignition and test again (OK). Remove engine and check valve clearances, etc. Dyno sheets enclosed.
